Curriculum Vitae

Pedro António Castela Nolasco

1. Personal Data

Nationality:	Portuguese
Age:	28
Email:	pacnolasco@gmail.com
LinkedIn:	https://www.linkedin.com/in/pedro-nolasco/
Portfolio:	https://pacnolasco.github.io/

Senior Software Engineer with over six years of experience architecting high-scale monitoring platforms and real-time distributed systems that meet global demands. I have moved from implementing Java-based backends to architecting monitoring platforms and navigating high-stakes technical strategy across Europe and the Asia-Pacific.

Much of this work has been rooted in the fintech sector, where I have collaborated with multidisciplinary teams from diverse technical and cultural backgrounds. I am particularly drawn to complex challenges that test my technical limits and drive me to new perspectives, and equip me with the advanced skills necessary to excel.

2. Work Experience

Jul 2024 – … **Senior Software Engineer, Feedzai Portugal (remote)**

Jan 2023 – Jun 2024 **Professional Software Engineer, Feedzai Hong Kong (onsite)**

Sep 2021 – Jan 2023 **Software Engineer, Feedzai Portugal (remote)**

Architectural Strategy: Architected and implemented high-availability fraud detection solutions leveraging a machine-learning-first approach for global banking and e-commerce leaders.

Distributed Systems: Engineered real-time distributed architectures processing mission-critical financial streams via Cassandra, Spark, RabbitMQ, and Zookeeper to protect millions of transactions worldwide.

International Technical Lead (APAC): Relocated to Hong Kong (Jan 2023 – June 2024) to lead on-site technical consultations across Singapore and Australia. Successfully resolved complex integration challenges that directly secured major clients.

Cloud & Performance: Managed and optimised AWS cloud services (EC2, S3, CloudWatch) and optimised relational database schemas to enhance system performance and reduce storage overhead.

Aug 2020 – Sep 2021 **Microservices Management and Monitoring, Altice Labs Portugal**

Systems Migration: Led the end-to-end design and implementation of a monitoring system during the company's transition from monolithic to microservices architecture.

Observability Stack: Deployed comprehensive observability tools (Prometheus, Grafana, Graylog, Jaeger) enabling deep-trace visibility across Java-based distributed services.

Infrastructure: Streamlined deployment workflows using Docker, Docker Compose, and RPM packaging for EL7 environments.

Jun 2018 – Aug 2018 **Coordinator of EUSA Results System, European University Sports Association**

Managed real-time results for the European Universities Games, leading a multidisciplinary team of volunteers and facilitating cross-functional technical communication.

3. Educational Qualifications

Sep 2018 - Jun 2020 **Master's degree in Informatics Engineering** with specialisation in Software Engineering in the Faculty of Sciences and Technologies of the University of Coimbra. My final dissertation, titled *"An information system for assessing and guiding industry 4.0 strategies,"* explored digital transformation methodologies by developing a full-stack web application using React.js, Node.js, and MySQL. This research, which achieved a grade of 19/20, bridged theoretical concepts with real-world applications through a pilot at CELBI and a subsequent presentation at a top information systems conference (AMCIS 2023).

Sep 2015 - Jun 2019 **Bachelor's degree in Informatics Engineering** in the Faculty of Sciences and Technologies of the University of Coimbra. Curriculum aligned with IEEE/ACM/AIS standards, focusing on Computational Intelligence, Distributed Systems, and Software Engineering, complemented by fundamentals in Management and Economics.

Sep 2012 - Jun 2015 Secondary Education - Science and Technology Course, at Quinta das Flores Elementary and Secondary School, Coimbra.

4. Technical Skills

My technical foundation is in object-oriented design and development, primarily focused on architecting robust backend systems and APIs using Java. I consistently write clean, testable, and maintainable code in Agile environments. Additional skills and hands-on experiences include:

- Leverage AWS services (including EC2, S3, DynamoDB, RDS, and CloudWatch) to effectively deploy, monitor, and troubleshoot enterprise products within complex cloud computing environments.
- Optimised relational database schemas to enhance performance and reduce storage overhead.
- Containerising Java applications using Docker by creating Docker images from scratch and virtualising servers for test and development environments using Docker Compose.
- Monitoring distributed systems using the Cloud Native Foundation tools for metrics, logs, and traces. Implementing monitoring to Java services, Kafka, RabbitMQ, load balancers, and databases. Implement logging in Java applications using GELF appenders to send logs to Graylog and tracing with OpenTelemetry to Jaeger.
- Built responsive front-end interfaces using React.js within Node.js and MongoDB stacks for university research, hackathons, and personal innovation projects.

Proficient in additional languages and tools including Python, C, and Ansible. Additionally, I have extensive experience in managing both Linux and Windows operating systems.

Native language: Portuguese

Fluent in the following languages:

	Understand		Speak		Write
	Oral comprehension	**Reading**	**Oral interaction**	**Oral production**	**Write**
English	C1	C1	C1	C1	C1
Spanish	B2	B2	A1	A1	A1

Levels: A1/A2: basic user, B1/B2: independent user, C1/C2: advanced user. Source: Common European Framework of Reference for Languages

5. Certificates

A list of certifications that demonstrate my professional development alongside my technical skills:

2022 & 2024 Certified Scrum Product Owner® (CSPO®)

2023	AWS Certified Cloud Practitioner
2023	AML 360
2022	Principal Developer masterclass

6. Hobbies and Other Skills

A list of hobbies and extracurricular activities that fostered my professional development:

2015 - 2020	Organisational, social and cooperation skills - Member of the academic music group Estudantina Universitária de Coimbra of Fado Section of the Academic Association of Coimbra.
2016 - 2019	Cooperation in the organisation of the Festuna event. International Tunas Festival, organised annually to host about 150 students from Portuguese and foreign universities.
2017	Co-founder, product manager, developer and marketing of the application: CoimVivio (inactive).
2013	National canoeing champion k4 cadet "Primeiras Pagaidas - Fase Final".
2012	Suitcase Museum, student exchange. Quinta das Flores Secondary School (Coimbra, Portugal) and Prirodo-Matematicheska Gimnazia (Montana, Bulgaria).
